

7 new pools in the "most attractive hotel garden of Austria"

schwarz
***** alpenresort

After a building phase of half a year, the largest and most unique pool landscape in the country has been built in Austria's most attractive hotel garden. The "Schwarz Water World" has 7 pools and a "Nature experience" lake.

The hotel garden of the Alpenresort Schwarz is really something special, having been given the "Austria's Garden of Eden" State Prize for Tourism of the Austrian Republic. The lovingly tended and manicured garden truly is a paradise, with nature unfolding in all its glory and diversity across an area covering 32000m². To integrate a superlative pool landscape into this required a very subtle approach. The hotelier family Pirktl and their architect, Professor Karl Landauer, succeeded in a magnificent way and are once more truly ahead of their times. Where they were once pioneers of the spa and wellness concept, they are again unique with the "Schwarz Water World".

The "Schwarz Water World" is a bathing oasis guaranteed to amaze guests. The new indoor pool is a building open on all sides that provides a bright atmosphere that is flooded with light in summer and winter. A 20m long sports pool for the energetic swimmer, the experience pool with an artificially-designed waterfall and a grotto provide a welcome for bathers during all seasons. The finishing touch is provided by a large number of relaxation lounges and extremely comfortable water beds at different levels, all with a view of the garden and the surrounding Alpine world. An open chimney and a small tea bar provide 'ambience par excellence'.

There is a swimming sluice that leads out to the pleasantly-heated 34° relaxation pool with integrated massage lounges. Within the expansive hotel garden, you can choose between a further 14m long sports pool, a 34° warm saline pool and our "Adlerhorst" whirlpool - the jewel in the crown. This whirlpool is in an elevated position on a small hill in the garden and the bather has a fantastic panoramic view across the entire resort, as well across the wonderful Alpine backdrop. The well thought-through architecture and the positions of the individual pools make it possible to reach any of them easily and quickly, thus en-

joying swimming all the year round. An idyllically designed and generously laid out "Nature experience" bathing lake and a special pool for our junior guests complement the "Schwarz Water World".

What is more pleasant after bathing than to relax? The expansive and relaxing atmosphere of the unique and wonderfully pretty hotel garden is the ultimate temptation to linger and relax. Here, every hotel guest is guaranteed to find a quiet and peaceful spot. Whether it is under the many hundred-year old apple trees in the hotel garden or enjoying the fragrance of the many flowers, what more could one hope for? The cosy loungers are also situated all around the banks of the bathing lakes and around the various pools.

One speciality is the panorama sun deck on the roof of the pool building. From these lofty heights, one can enjoy the fabulous surrounding resort scenery and the breathtaking Alpine panorama from comfortable loungers. The central point of the rooftop lounge area is a reflecting crystal.

The diversity of the pools, the stylish building method, the many lovingly applied details and the very special position of the resort make the "Schwarz Water World" a bathing dream that will not be forgotten.

"Schwarz Water World" facts

- 7 pools with a water surface of 450 m²
- Garden pool building covering 700 m² with 2 indoor pools and 40 loungers
